

The Ohio Department of Transportation (ODOT)

The I-75 Improvement project is divided into 8 phases. The new alternative that has been developed for phases 5 and 6 (Lockland) that proposes to unify the interstate (eliminate the “Lockland Split”) along I-75 southbound from Shepherd Lane to SR 126 to provide 4 southbound lanes and 4 northbound lanes. In addition to the new alternative alignment on IR 75, ODOT would like feedback on potential connections to Shepherd Avenue at West Forrer and Westview and on various intersection configurations at Millsdale Street and Anthony Wayne Ave. ODOT is currently creating a report which will gather more information on how the new alternative could impact private property, public parks, historic sites, streams and wetlands, habitat, landfills/other regulated sites.

This study, along with your input, will determine how to move forward with improvements to I-75.

How can I learn more about the project?

View the official ODOT project webpage with information about all of the Thru the Valley phases www.transportation.ohio.gov/projects/mega-projects/mega-projects/75-valley

Contact Krista Blum, Village Administrator at Kblum@locklandoh.org or call 513-761-1124.

The Village plans to hold a local public hearing to obtain questions and comments on the proposed connection from West Forrer to Shepherd Avenue. The date of said local public hearing will be determined once the Village receives all of the options from ODOT.

How can I submit comments or questions?

- Email the Environmental Project Manager: Keith Smith, Keith.Smith@dot.ohio.gov
- Call Keith: 513-933-6590
- Mail a letter to:

Ohio Department of Transportation, District 8
